

****What is a QNAP used for?**

QNAP Stands for (**Quality Network Appliance Provider**)

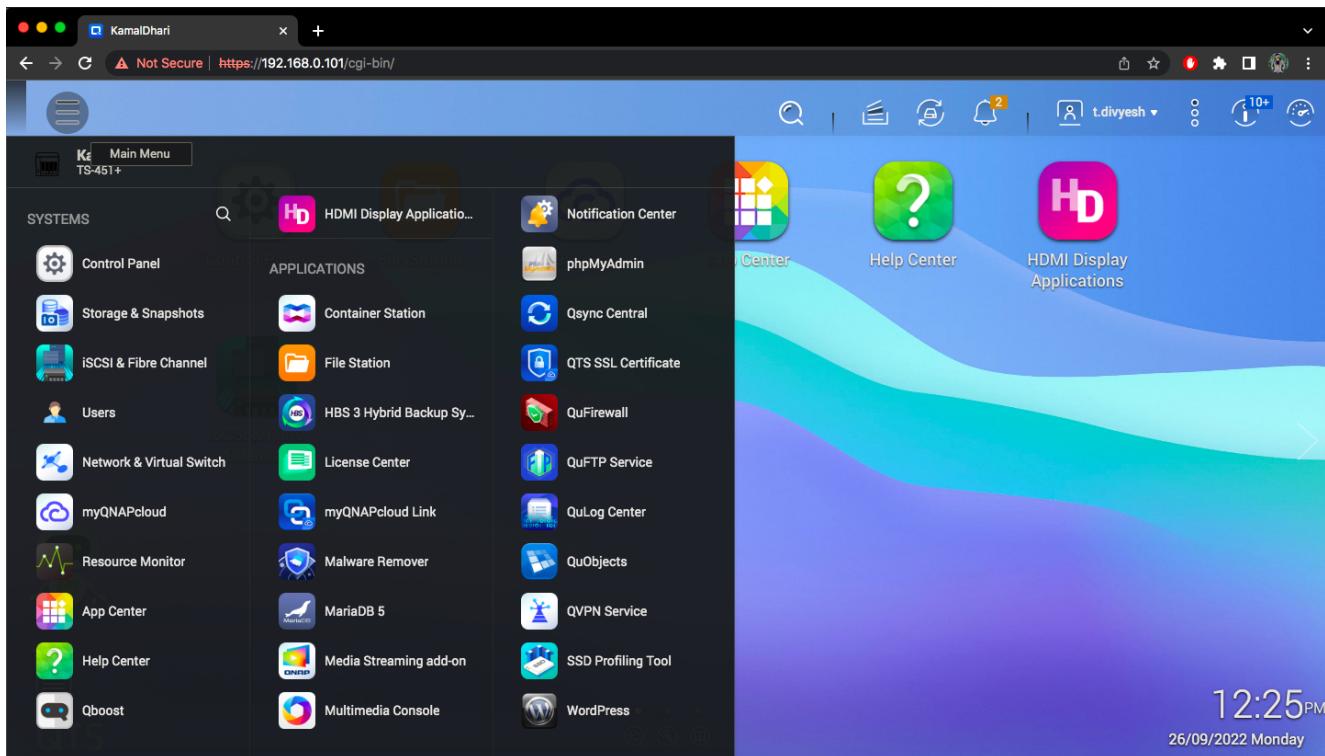

QNAP's Network Attached Storage(NAS) are systems that consist of one or more hard drives that are constantly connected to the internet. The QNAP becomes your backup "hub", or storage unit that **stores all your important files and media such as photos, videos and music.**

****How to connect to QNAP NAS server by using IP Address**

So simple just type IP address in any browser :192.168.0.101 . and then insert the credentials .

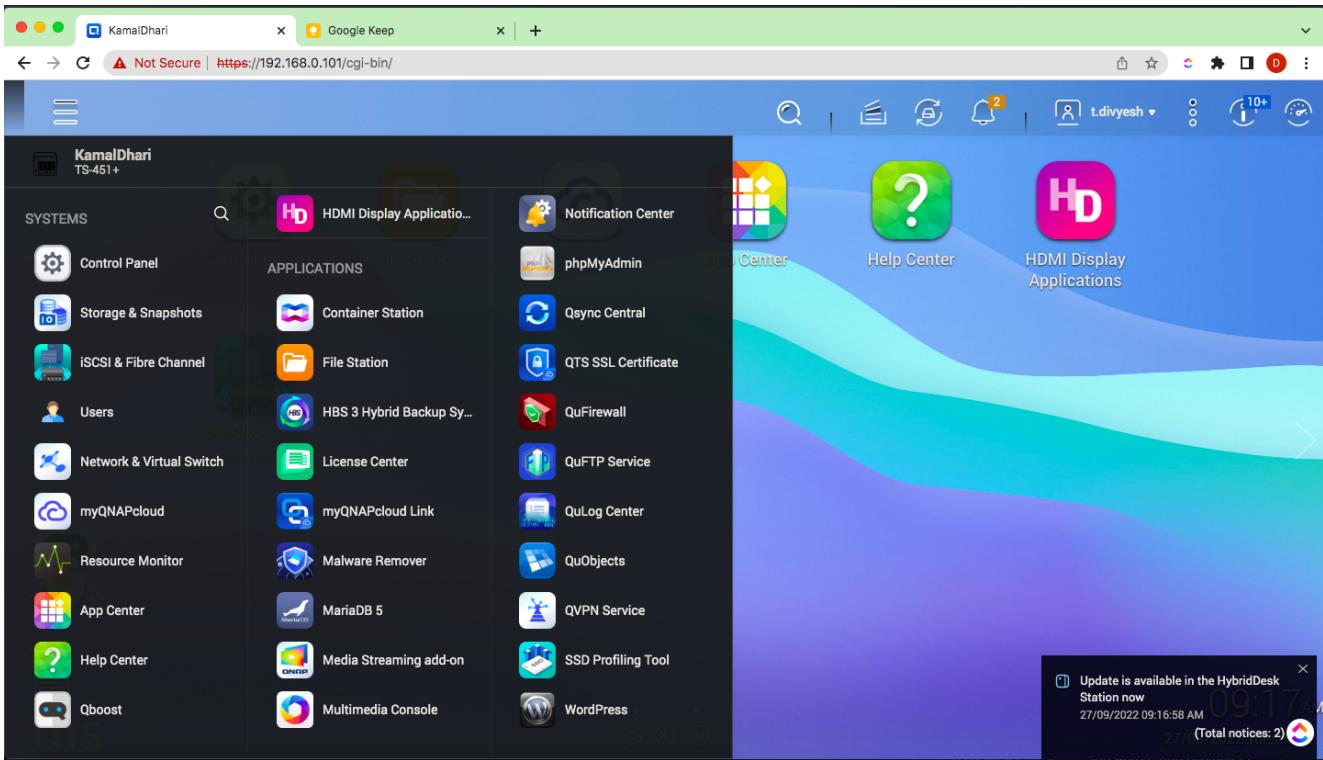

After entering the credentials this page will appear and we can see all the option

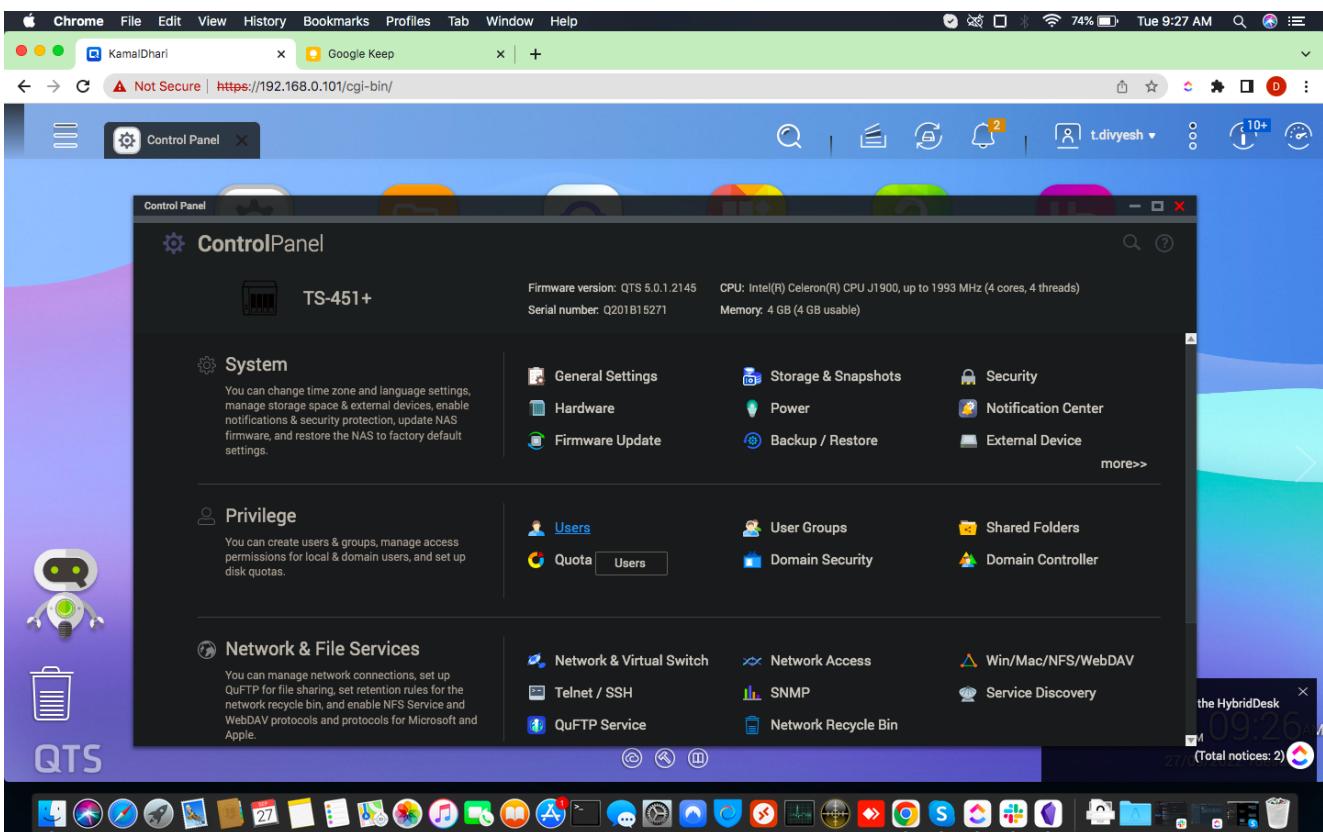

How to Create users in Qnap

First Click on upper left corner you will see main menu

then you will see the control panel. open control panel

and you will see users option in Priviledge Section. open users options

The screenshot shows the QNAP Control Panel interface. On the left, there's a sidebar with icons for System, Privilege, Network & File Services, and Applications. The main area is titled 'ControlPanel' and has a sub-menu for 'Users'. A modal window titled 'Create a User' is open, showing fields for Username, Password, Verify Password, Mobile phone (optional), and Email (optional). To the right of the modal is a table titled 'Local Users' with columns for Description, Quota, Status, and Action. The table lists several users: administrator, Heena, Vishal, Vimars, Khushbu, Nashrullah, Aeny, and Alfaraz. Each user row has edit and delete icons.

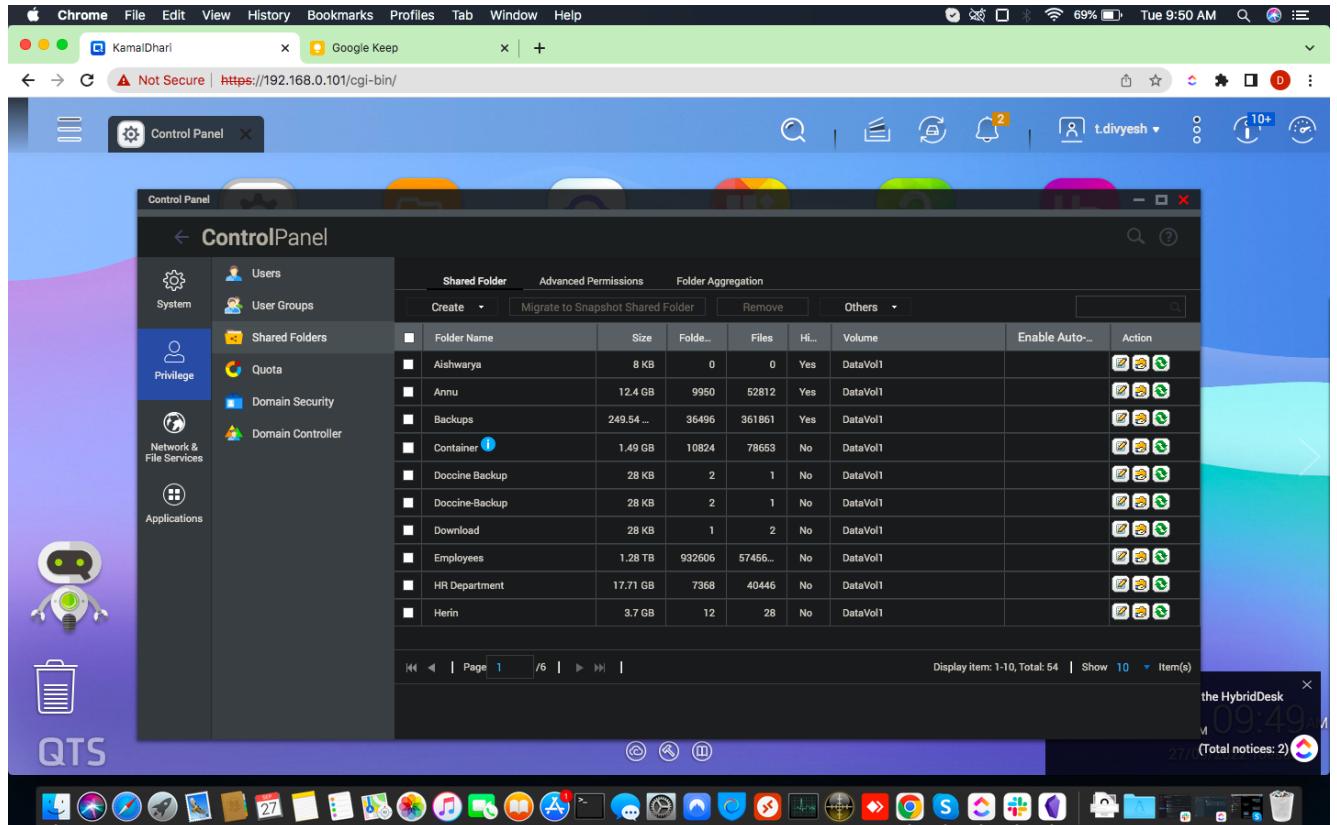

and from here you can Create a new user in Qnap. Just Fill all the details of user you want to add
give them the permissions on read/write.

This screenshot shows the 'Create a User' modal window. It includes fields for Username, Password, Verify Password, and optional fields for Mobile phone and Email. There are also sections for User Group (set to 'everyone'), Shared Folder Permission (with options for Read Only or Read/Write), and Edit Application Privilege (set to 'Unrestricted access to all applications'). At the bottom of the modal are 'Create' and 'Cancel' buttons.

Now New User has been Created.

How to Create Shared Folder in Qnap

Do the same just open the control panel and you will see Shared Folder option in Priviledge Section. open Shared Folder and you will all the list of all users.

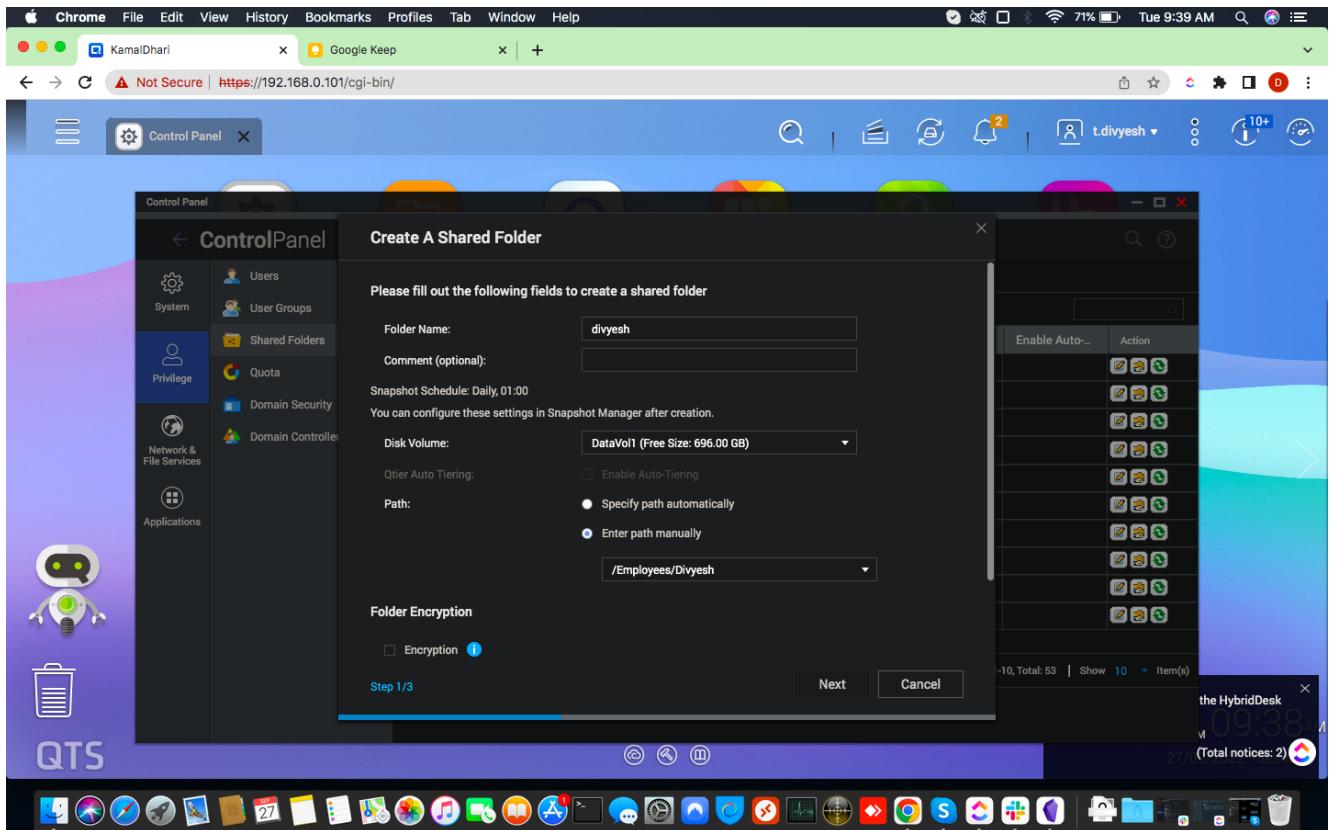

Just create a new user in shared folder.

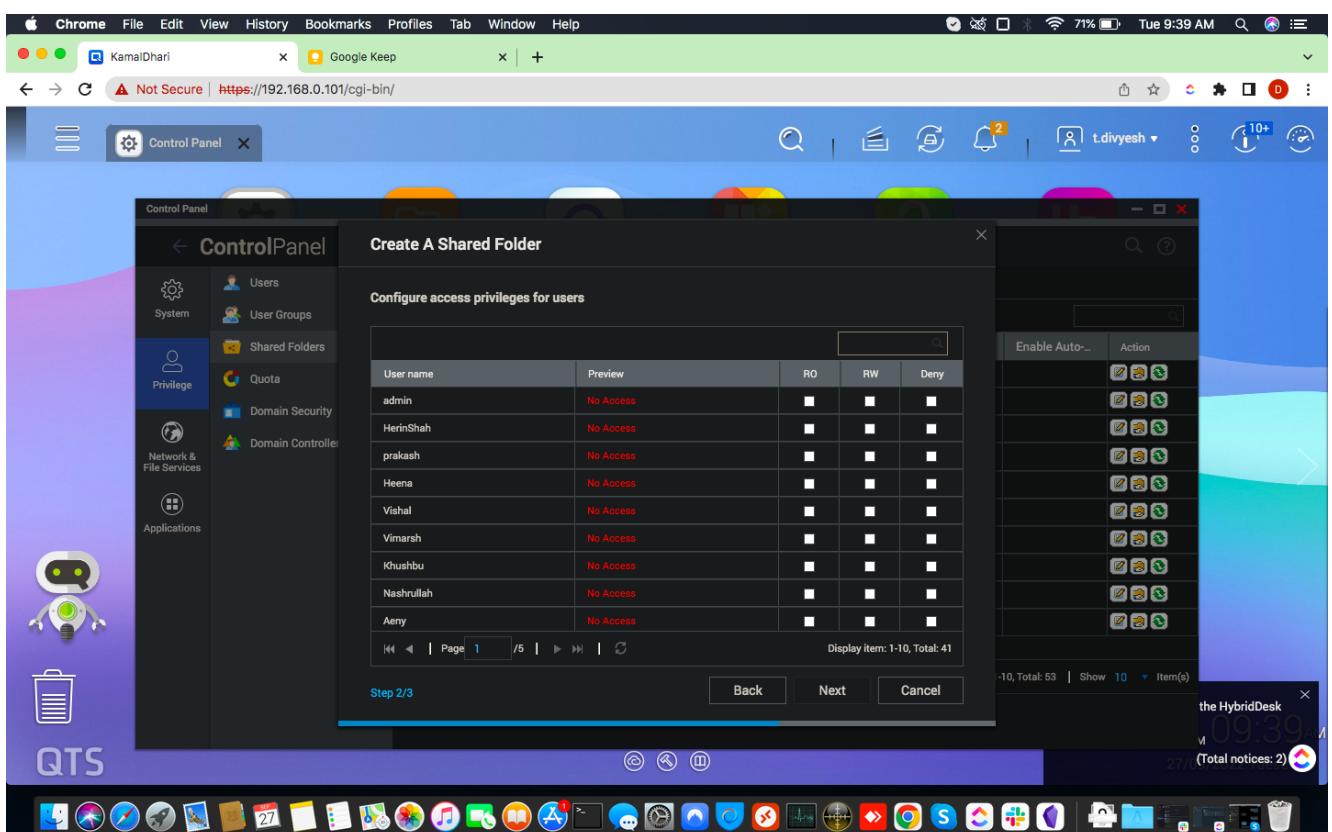

By click on Create option

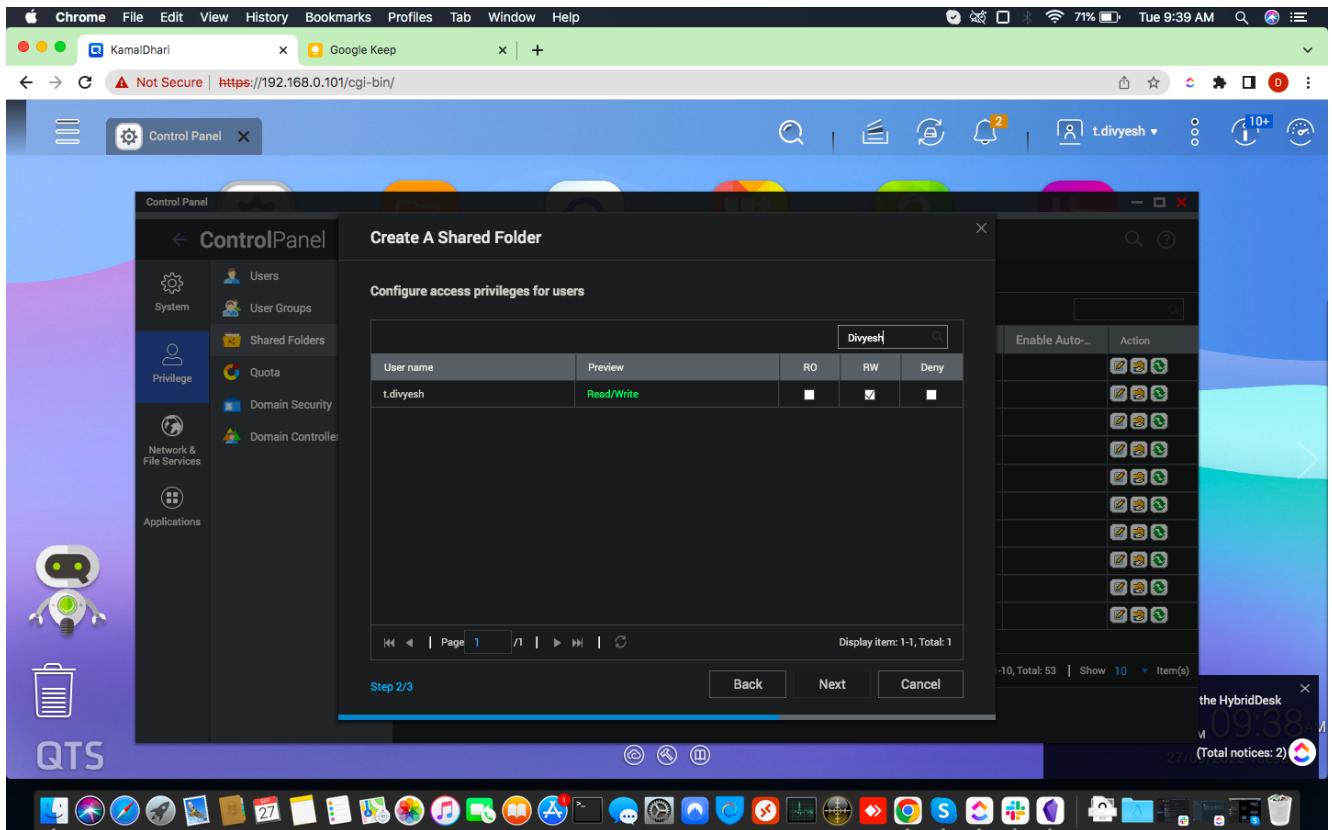

Name your folder. which you want to share

give the a path--> and click on next

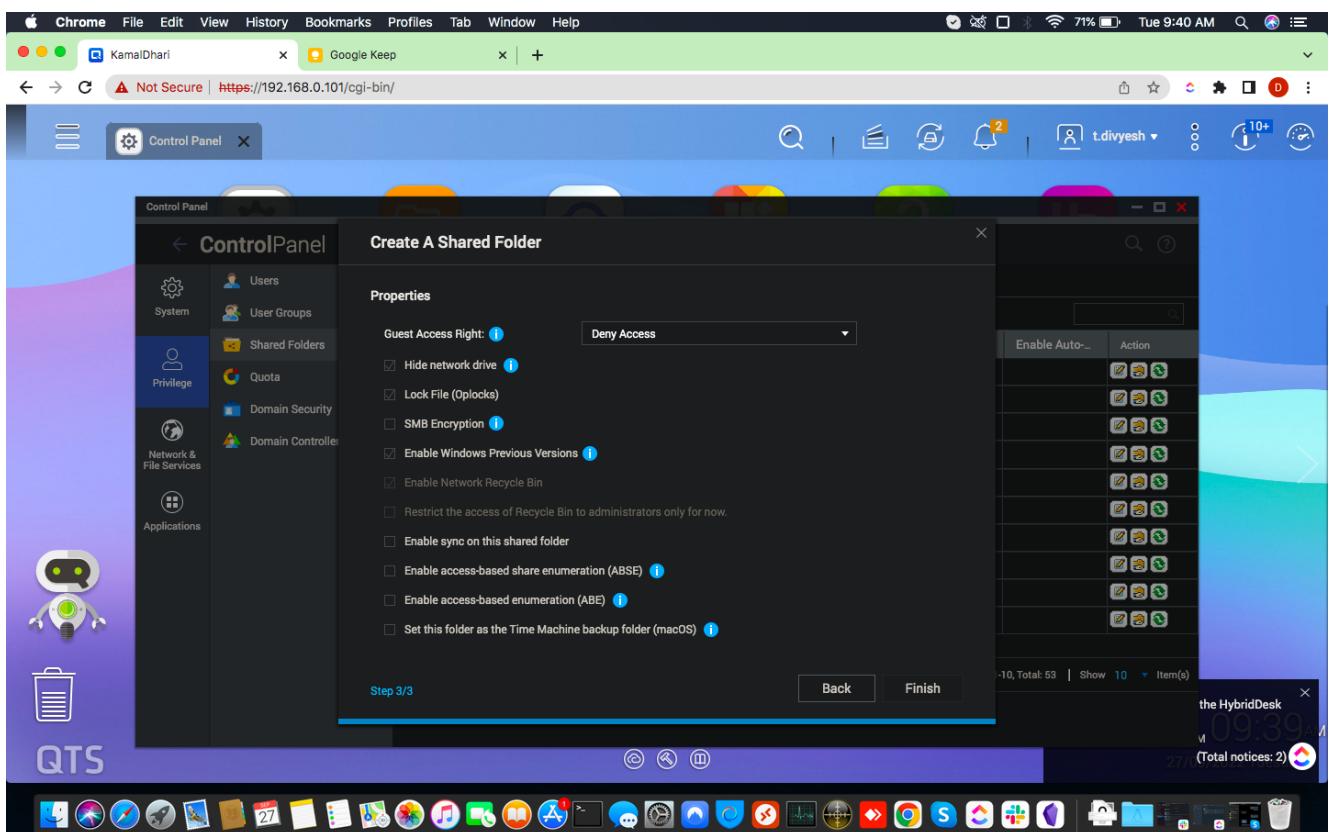

Now serach you name and give then a permission.

click on hide network drive and allow and Finish.

and click OK.
